Eee PC 1225B Netbook

The AMD Brazos E450 dual core processor features an Accelerated Processing Unit architecture that combines the CPU and discrete-class GPU on a single chip to deliver superior graphics and a faster processing performance, all the while consuming less power.

Bluetooth 3.0 supports fast, wireless connectivity between diverse digital devices while USB 3.0 transfers files 10 times** faster than USB 2.0, supporting quick transfer of large files.

The processor's lower power consumption delivers up to 7 hours* of unplugged computing freedom, allowing users to get more done while on the go.

With Wi-Fi Direct, users can wirelessly transfer files between the netbook and other compatible devices directly without having to go through a network. With DLNA, users can effortlessly stream content wirelessly between compatible devices connected to the same network, without having to store the content on both devices.

Users can share full HD 1080p content in the classroom or in the boardroom by projecting content from their PC onto a compatible external display via the HDMI port.

Complimentary additional 3GB WebStorage is a cloud storage service that allows users to backup data, sync files between devices and share data with colleagues.
